

# Omar Estevez

Fullstack Developer

## SUMMARY

Highly committed Fullstack Developer with experience in creating ecommerce apps and websites using React, Javascript, Node, accessibility, 3rd party tools, and my creative passion for the highest standards in user experience. Looking for a role that utilizes my skills and experience, becoming a valuable asset and continuing my growth with other great people both professionally and personally.

## WORK EXPERIENCE

### Edification

Web Developer

May 2021 - Present

- Created and designed a website with industry standard UI/UX using modern tools such as Styled-Components, GatsbyJS, ReactJS.
- Guaranteed growth in traffic by 60%, and increased page views 4x utilizing GatsbyJS for its SEO customization, and server side rendering features.
- Established a user friendly site by creating custom ARIA attributes, testing with Jest, Orca for text to speech, and meeting ADA compliance.

### MediumPhormat

Web Developer

October 2020 - December 2020

- Increased traffic and user engagement 3x by customizing the UI and integrating social media content using Liquid to customize the Shopify theme for a better user experience.
- Increased revenue to the company by organizing services intuitively so that customers can discover additional services easily.
- Guided client on how to use the Shopify site builder to make any minor adjustments to images, text, or UI easily.

### Lock & Key Remedies

Fullstack Developer

November 2018 - Present

- Established a new avenue to sell products online by integrating BigCommerce, an e-commerce payment system.
- Created a website establishing a better user experience providing growth and engagement by utilizing 3rd party tools, and social media API's maintaining industry standards in UI/UX.
- Increased overall sales by rebranding the logo and collaborating over the product designs.
- Improved overall accessibility of the website to 90% meeting ADA compliance, by incorporating Accessibi a 3rd party tool, and creating custom ARIA attributes.

### MicroNet

Onsite Engineer

February 2020 - June 2020

## PROJECTS

- **DaazzII** — A self promotion, social networking platform for creatives.
- **MoonScraper** — A scraper collecting data about crypto from text, images, based on certain parameters and filling out to Excel.
