

Omar Estevez

Software Engineer

Summary

Highly committed and creative Software Engineer with a passion for the highest standards in user experience, and accessibility. Providing exceptional solutions for clients, while mentoring others in the field. Looking for a role that utilizes my skills, and continuing my growth with other great people both professionally and personally.

Projects and Contributions

Daazzll

github.com/OmiCoding/Daazzll Jun 2022

- A self promotion social networking platform for creatives to display a portfolio of animated content such as gifs, short clips, and videos.

Mermaid

CLI Contributor Oct 2022

- Contributed to the Mermaid CLI allowing users to format .mmd and .md files to their expected formats by adding code and necessary tests to fix the bug issue.

Amplification

Frontend Contributor Oct 2022

- Contributed to Amplification becoming spotted in the Github Release Radar for Hacktoberfest by fixing React.js bug issues in the project.

Experience

Edification

Frontend Software Engineer May 2021- Jun 2021

- Created and modernized website with current industry UI/UX patterns utilizing tools such as Styled-Components, GatsbyJS, and ReactJS to achieve it.
- Increased growth in traffic by 60%, and tripled (3x) page views by utilizing GatsbyJS for its SEO customization, and server side rendering features.
- Established ADA compliance by creating accessibility with custom ARIA attributes, testing web components with Jest, and analyzing with Orca the text reader.

MediumPhormat

Frontend Software Engineer Oct 2020 - Dec 2020

- Tripled (3x) website visitors per month by customizing the UI and integrating social media content, and using Liquid to customize the Shopify theme for a better user experience.
- Increased revenue to the company by improving user experience, organizing services so that customers can discover additional services easily.
- Enabled self service for client by teaching about Shopify's site builder and the Liquid language to make any minor adjustments to website if needed.

Lock and Key Remedies

Fullstack Software Engineer Sep 2018- Sep 2019

- Increased sales by integrating BigCommerce an e-commerce platform, rebranding the logo, and collaborating over product designs.
- Created a website establishing a better user experience providing growth and engagement by utilizing 3rd party tools, social media API's, and maintaining industry standards in UI/UX.
- Achieved ADA compliance by incorporating Accessibi a 3rd party tool, creating custom ARIA attributes, and applying Javascript if needed.
